Project Design Phase-I
Solution Architecture
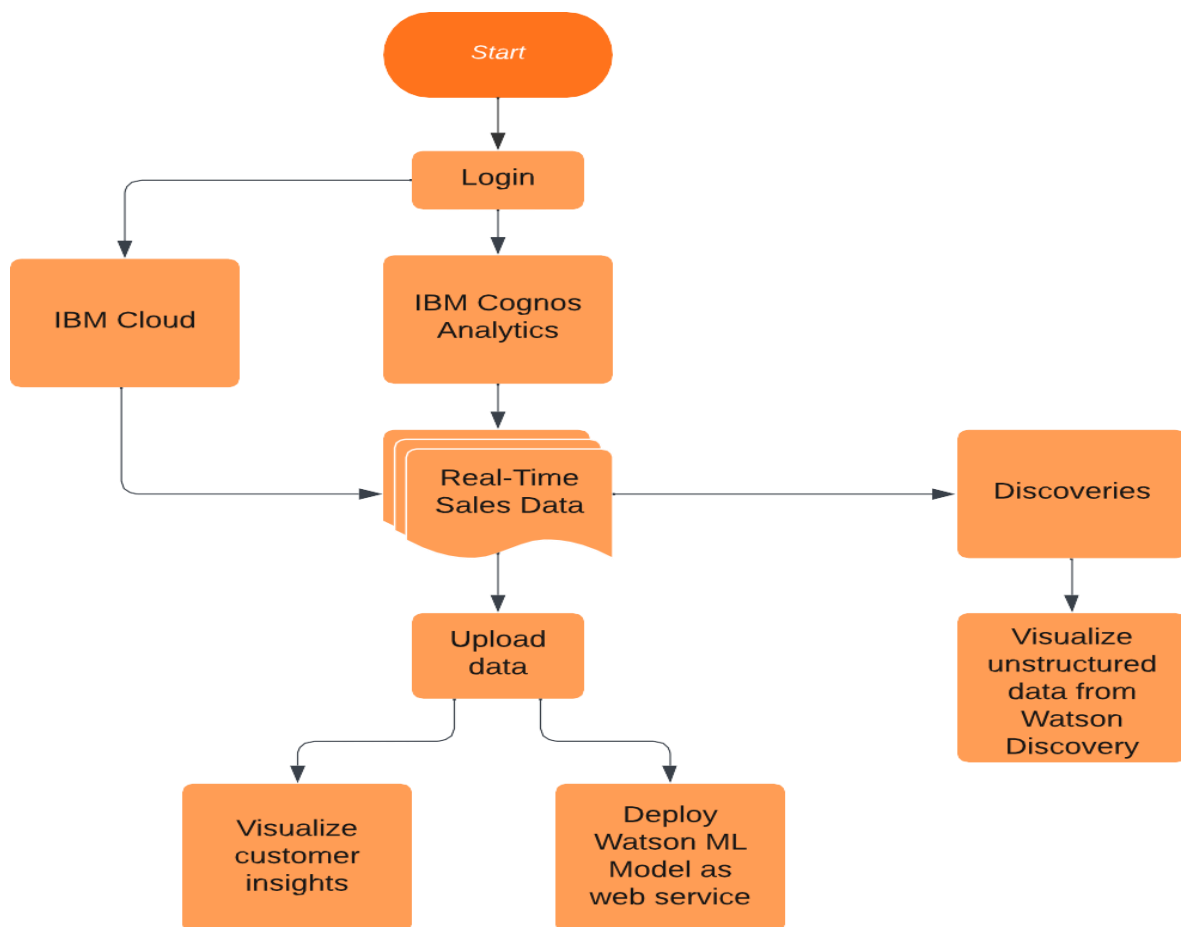

Date	31 October 2022
Team ID	PNT2022TMID51031
Project Name	Global Sales Data Analytics
Maximum Marks	4 Marks

Solution Architecture:

Solution architecture for Global Sales Data Analytics consists of the following.

- Users must authenticate themselves using the device.
- Data to be gathered include sales data and customer data.
- Data cleaning to remove empty and duplicate data.
- IBM Cognos Analytics with Watson is IBM's cloud analytics platform used.
- Data must be submitted and then prepared before being linked to relationships.
- Our user interface is provided with integration with Cognos analytics.
